TORIC CUSTOM LENS

The Solus™ TCL is a Soft Back Surface Toric Lens for Daily Wear

The **Solus™TCL** toric custom lens is designed for correction of corneal and residual astigmatism. **Solus™TCL** combines the base curve design of soft back surface toric lenses with computer-controlled lathing that generates a lenticulated front surface. The result is a reduction in the amount of lens material, improved stabilization and excellent visual acuity.

Produced from a new generation of GMMA + VP soft lens material, the lens allows increased moisture retention during wear and is resistant to deposits. **Solus™TCL** lenses are manufactured with a blue visibility tint for easy handling and are packaged in single-lens vials and 4-vial economy packs.

Lens Material: Acofilcon A

The lens material GM3 is a terpolymer based on a high purity Glycerol Methacrylate 2, 3-Dihydroxypropyl Methacrylate (GMA). Manufactured with a blue visibility/handling tint. When hydrated, the lens consists of 42% Acofilcon A and 58% water by weight when immersed in normal saline.

Fitting Procedure

Solus™TCL is easy to fit empirically with a high success rate. The lens is stabilized by adding ballast to the front, maintaining the cylinder in the base curve. A "dot" is engraved at six o'clock to assist in calculating alignment of the lens.

Recommended Wearing Schedule

Solus™TCL lenses are designed for daily wear on a 3-month replacement schedule.

Cleaning

Hydrogen peroxide or a chemical disinfecting system (MPS) is recommended for cleaning the lens.

Lens Properties

Water Content 58% in saline at 20°C	Tensile Strength 6.61 kg/cm ²	Refraction Index (wet) 1.39	Oxygen Permeability (DK - Fatt scale) 22 x 10 ⁻¹¹ at 35°C
--	---	--------------------------------	---

Lens Parameters

Diameter 13.5 mm, 14.5 mm* and 15.0 mm	Posterior Curve Toric with blended peripheral curves	Front Curve Lenticulated with prism ballast (varies with power)
Power Range +20.0 D to -20.0 D	Nominal Centre Thickness 0.19 mm at -3.00 D	Base Curve Range 8.10 mm to 9.30 mm (in 0.3 mm steps) 8.4 mm*, 8.7 mm*, 9.0 mm*
Cylinders -0.25 D to -10.00 D	Axis 0° to 180° in 1° steps	Optical Zone Diameter 8.00 mm at -3.00 D (varies with power, sphere and cylinder)

Note: Matching sphere lenses available.

solus55a™

Enhanced Vision

- > Advanced aspheric optical design provides excellent performance to enhance vision.
- > UV blocking protects from the harmful effects of ultraviolet light.

Predictable and Reproducible Quality

- > Truform™ cast molding process ensures consistent high quality, thin, smooth, lens to lens reproducibility.
- > Unique lens design improves comfort by reducing unnecessary thickness in the lens by incorporating a pressure relieving edge lift to reduce any scleral indentation.
- > ISO 9001:2000 and ISO 13485:2003 certified facilities.

Convenience

- > Easy to handle for both the experienced and first-time wearers.
- > The design assists with correct lens orientation to minimize chances of inverted lens insertion.

High Patient Satisfaction

- > Results from an extensive clinical study* showed equivalence of the **Solus™55a** to three leading lens brands in vision, comfort and handling.
- > 56% of the wearers preferred **Solus™55a** versus the other brands.
- > Those wearers selecting the **Solus™55a** as their preference were 5 times more likely to purchase the lens over any other brand.

Lens Specifications

Material 45% methafilcon A, 55% water	Lens Design Tangential flat back edge, reducing aspheric front optic	Handling Tint Light Blue
Base Curve 8.70 mm (Single fit)	Diameter 14.5 mm	Power Range -12.00 to +6.00 (steps: 0.50D > +4.50 & -6.50)
Wear Indication Daily Wear	Nominal Centre Thickness** 0.09 mm	DK @ 35°C 18.8 X 10 ⁻¹¹ (cm ² /s)/(mlO ₂ /ml.mm Hg)
Pack Size 6 lenses	Diagnostic Lenses Single Blisters
